FER20E Dataset Access Request Form

(Academic and noncommercial research access)

****Complete this form and submit it with the signed Data Use Agreement to the designated dataset contact. Submission does not itself grant access.***

Request reference: _____ Date: _____

1. Applicant and supervisor

Full name: _____

Designation or programme: _____

Department and institution: _____

Institutional email: _____

Supervisor or principal investigator: _____

Supervisor institutional email: _____

2. Proposed research and access

Project or thesis title: _____

Research objectives and intended use (attach a brief description if needed):

_____

_____

Requested version or subset: _____

Requested access period: From _____ to _____

Other users requiring access (names and institutional emails; attach list if needed):

_____

Storage location and access controls: _____

Funding or commercial involvement, if any: _____

Ethics approval reference, or reason not applicable: _____

3. Declaration and endorsement

I confirm that the information is accurate and that the proposed use is academic and noncommercial. I will use the dataset only after approval and in accordance with the signed Data Use Agreement. The supervisor or principal investigator endorses the request and will oversee compliance.

Applicant signature: _____ Date: _____

Supervisor or PI signature: _____ Date: _____

Provider use only: Approved / Declined / Further information required

Approved version and users: _____

Approver name and signature: _____ Date: _____

FER20E Data Use Agreement

(Academic and noncommercial research access)

This agreement governs access to the approved FER20E release for the research described in the associated Dataset Access Request Form. Complete the fields and any additional conditions before signing.

1. Parties and approved release

Provider legal name and address:

_____

_____

Recipient institution and address:

_____

_____

Applicant: _____

Supervisor or PI: _____

Request reference: _____ Approved project: _____

Dataset version or subset and release manifest reference:

_____

Access start date: _____ Access end date: _____

Provider contact email: _____

Recipient contact email: _____

2. Terms of access

2.1 Permission. The Provider grants the approved users a limited, nonexclusive, nontransferable permission to access and use the specified dataset solely for the approved academic and noncommercial research during the access period. Access begins only after Provider approval and execution of this agreement. A different purpose, additional users or an extension requires prior written approval.

2.2 Ownership and source restrictions. No ownership is transferred. Rights in images, annotations and other materials remain with their respective rights holders. The Provider shall identify applicable source restrictions in the release documentation and authorise only material it is entitled to share. This agreement does not override third-party rights, consent limitations or applicable law.

2.3 Authorised users and redistribution. Access is restricted to the individuals approved in the request form or its attached user list. The Recipient shall not sell, sublicense, redistribute, publicly upload or share the dataset, any image-containing subset, or download credentials. External collaborators must obtain separate approval. Commercial use requires a separate written agreement from the appropriate rights holder.

2.4 Privacy and research scope. Users shall not attempt to identify, contact or locate depicted individuals, link the images to personal records, or use the dataset for surveillance or decisions about individuals. Users shall comply with applicable privacy requirements and obtain any ethics approval required for their research. Expression labels are research annotations and must not be treated as verified internal emotional states.

2.5 Security. The Recipient shall use institution-approved storage with access controls and appropriate encryption, restrict access to approved users, and protect download credentials. Upload to public repositories or third-party AI services is prohibited. Cloud processing requires an institution-approved environment whose terms do not permit provider reuse of the data.

3. Publications and research outputs

3.1 Citation. Publications and other research outputs using FER20E shall cite “FER20E: An Extended Facial Expression Recognition Dataset With 20 Discrete Emotions” using the complete citation in the release README and identify the dataset version used. Access does not create any obligation to offer co-authorship or imply endorsement by the dataset creators or Provider.

3.2 Images and derived outputs. Aggregate findings and independently written analysis code may be published. Dataset images, recognisable examples, image-containing derivatives and identifiable embeddings may not be published or redistributed without prior written permission and any necessary third-party permissions. Before releasing trained models, the Recipient shall assess whether they expose or enable recovery of protected images or personal information and comply with the release restrictions.

4. Incidents and end of access

4.1 Incident reporting. The Recipient shall notify the Provider contact without undue delay after discovering loss, unauthorised disclosure or misuse, promptly restrict further access and cooperate in reasonable containment and corrective action.

4.2 Suspension and termination. The Provider may suspend or terminate access by written notice for breach, loss of permission to distribute, or a substantiated rights or privacy concern. The Recipient may end access by written notice. Use must cease on expiry or termination unless a written extension is granted.

4.3 Deletion and retention. Within 30 days after expiry or termination, the Recipient shall delete dataset copies and image-containing or identifiable derivatives from active storage and confirm completion on request. Any legally required retention must be disclosed to the Provider, isolated from further research use and deleted when the obligation ends. Inaccessible backups shall be removed through the normal secure deletion cycle and not restored for use. Nonidentifiable aggregate results and compliant publications may be retained.

5. General conditions

The dataset is supplied as available, without a guarantee of accuracy, completeness or fitness for a particular purpose, to the extent permitted by applicable law. The Recipient remains responsible for its research use. Changes must be agreed in writing by authorised representatives. Restrictions concerning redistribution, privacy and retained materials continue after access ends. Unresolved matters shall first be referred to the parties’ designated institutional contacts.

6. Acceptance and signatures

By signing, the parties and users accept these terms. The Provider signatory confirms authority to approve the specified release; the Recipient signatory confirms authority to bind the Recipient institution.
